## Release Notes

### ACS WebService® Release 7.3.2

**Overview:** Release 7.3.2 provides Speco DVR support and updates all control panels to obey the new Daylight Savings Time dates.

#### Speco DVR Support

Brivo ACS WebService now supports integration of the Speco TN Series DVRs for live and event video playback. Please see the "Speco DVR Installation Notes" section in the Administrator's Manual for more information on configuration, limitations, and specific models supported.

#### Daylight Savings Time Update

In 2005 President Bush signed into law a broad energy bill that will extend Daylight Savings Time by four weeks beginning in 2007. Release 7.3.2 automatically updates all control panels to obey these new dates going forward. There is no user interaction necessary and users will see no disruption of service.
