Release Notes

ACS OnSite™ Release 1.0.4

Overview: Release 1.0.4 of the ACS OnSite application updates the control panel to follow the new dates being followed for Daylight savings time beginning in March 2007.

Updated Daylight Savings Time Dates

In 2005 President Bush signed into law a broad energy bill that will extend Daylight Savings Time by four weeks beginning in 2007. OnSite release 1.0.4 updates control panels to obey these new dates going forward.

This is a firmware upgrade that must be initiated by the customer. Customers should make a backup of all current account information and then obtain the new firmware version from www.brivo.com. Please see your OnSite Administrators manual regarding Firmware Updates.
