Release Notes

ACS WebService® Release 7.5

Overview: Release 7.5 of the ACS WebService® application offers an activity reporting feature with customized functions, as well as enhancements to the Dealer Extranet. This release also coincides with the beta release of Brivo's HID Edge Device program.

Activity Reports

ACS5000 WebService® users have always been able to run Activity Reports via the **Activity** tab. The 7.5 update provides a wider range of options that include the ability to generate reports from the past 365 days with unlimited event reporting when exporting to an HTML file, and up to 250,000 events per report when exporting to a CSV file. Also available in this release is the option to save these reports to an Excel file, as well as the ability to save the Activity Report in order to execute the same report in the future.

This function allows for the execution of reports according to criteria from **Fields**, **Devices**, **Sites**, **Groups**, and **Users**. The **Device** list allows you to view activity reports according to activity on specific doors or devices. The **Sites** list allows you to view activity reports according to a

site rather than particular doors. The **Groups** section allows you to view Activity Reports for all members of a group or groups. The **Users** section allows you to view a particular user's activity. You can also select the time frame that you would like the report to include, choosing between an **Absolute** time frame and a more flexible, or **Relative**, one.

If you want to include only a subset of the fields in your report, you can add a filter to any field to report on events such as:

- **Device** events, which report on any I/O device activity
- **Control Panel** events, which report on power status and/or tamper activity
- **Access** events, which report on all events pertaining to entry
- **Failed Access** events, which report on failed access attempts
- **User** events, which report on a particular user's activity

Edge Device Beta Release

We are pleased to announce the beta release of the Edge Device program, released on June 28, 2007.

Dealer Extranet

We have also made improvements to the Dealer Extranet, awarding greater control to the Dealer and the Dealer's ability to manage the creation of new accounts.
