## Release Notes

### ACS WebService® Release 7.8.2

**Overview:** Brivo is pleased to offer ACS WebService support for 75-bit PIV credentials in compliance with the FIPS 201-1 standard issued by NIST as of March, 2006.

The new card format can be accessed under the Cards section of the application.

Supported readers from the GSA's FIPS 201 Approved Product List include:

- iClass HID-RK40 (dual reader-keypad and iClass)
- iClass HID-R10
- XCEED IDXF-2100-PIV

The screenshot shows the Brivo ACS WebService interface. At the top, there is a navigation bar with the following links: Home, Activity, Users/Groups, Cards, Sites/Doors, DVRs, Schedules, Notifications, Reports, Account, and Lockdown. Below the navigation bar, there is a sub-menu with links: Card Bank, Add Cards, Delete Cards, Unknown Cards, and Badging. The main content area is titled "Add Cards" and contains the following form fields:

Card Format:

FIRST Batch Credential Number:

LAST Batch Credential Number:

Credential Number:

Site Code:

Agency Code:

At the bottom of the form, there is an "Add Cards" button.

This card format may be used with all Brivo ACS5000-E and ACS5000-G/W control panels, as well as with related expansion chassis and door boards.
