

Web Designer Engineering Department

We need a **superbly talented web designer** with between four and eight years of experience.

You will be working on high-availability, transactional web services targeting end users, mobile, and embedded devices for commercial applications.

You will get modern tools, smart and capable colleagues, and all the coffee you can drink.

Skill sets you'll need:

- Graphic design and layout
- UI and UX knowledge and judgment
- HTML4, CSS2, javascript 1.2 (ecma-262)
- IE7 (and forward) browser understanding
- Java knowledge a plus
- Familiarity with real-world, practical HTML5, AJAX and Comet are all pluses

Responsibilities you'll have:

- Design scalable, deeply interactive web applications, not corporate web pages
- Create modern, compelling user interfaces, which are fast, intuitive and visually appealing
- Work with product team to translate end-user requirements into interaction models, page designs, prototypes, and use cases
- Self-manage within an existing team of experienced, motivated professionals

The Company:

We are Brivo Systems, a growing development firm in Bethesda, MD, which is in the Washington, DC metro area.

Our work environment is casual, focused on results, open to creative thought, and provides a clear picture of business goals. We have a strong team, just enough process, lots of room for personal contribution, and a good deal of fun at lunch.

We honor experience, talent, accomplishment and drive over degrees, but if you have a degree in CS, HCI, UI/UX, graphic design, or a related field, that is a plus.

How To Apply:

We will be pleased to review your qualifications for this position if you submit a cover letter along with your resume, to jobs@brivo.com or fax to (301) 664-5242
