Release Notes

ACS WebService® Release 9.1

Overview: This release provides OVR WebService™ users with the ability to adjust camera parameters.

Brivo is pleased to provide our customers with the ability to optimize video captured with OVR WebService-enabled cameras. This new feature allows OVR WebService customers to adjust the brightness, color, contrast, rotation, and white balance of their cameras in order to capture enhanced camera footage.

The screenshot displays the Brivo Security Management System interface. At the top, the Brivo logo and "Security Management System" are visible. A navigation bar includes tabs for Home, Activity, Users/Groups, Cards, Sites/Doors, Video, Schedules, Notifications, Reports, Account, and Lockdown. Below the navigation bar, there are links for Help, Journal, and Log Out. A breadcrumb trail shows: DVRs > Add DVR > DVR Cameras > Add DVR Camera > Hosted Cameras > Register Hosted Camera.

The main configuration area is titled "Register Camera" and contains the following fields:

- Name: Back Door Camera
- Camera Type: Axis 209FD-R
- Serial Number: CIP40401
- Authentication Key: XHFFG77251K (without dashes)
- Device: Back Door
- Brightness: 50 (0 through 100, inclusive)
- Color: 50 (0 through 100, inclusive)
- Contrast: 50 (0 through 100, inclusive)
- Rotation: 0
- White Balance: automatic

A "Register Camera" button is located below the configuration fields. At the bottom of the page, the account information is displayed: Account: Acme Megaplex, Administrator: Sophia Rockwell. The footer contains the copyright notice: Copyright 2001-2009 Brivo Systems, LLC All Rights Reserved, with links to Privacy and Security and Terms of Use.
