

## Creating Solutions Through Integration

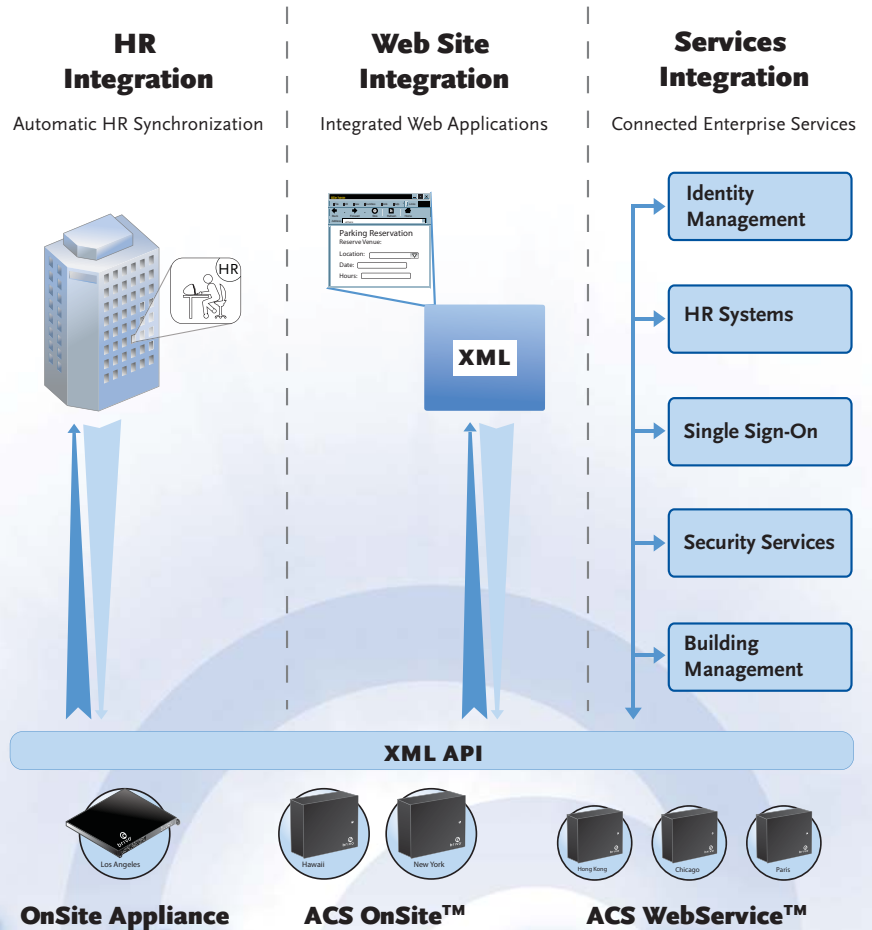

IP access control has potential yet to be realized. The convergence story is much more than one of being able to manage your access control system over the Internet. It's now possible to leverage existing access systems by connecting them to other enterprise systems and to the vast information services available across the Internet.

Integration enables access control, device management, and other systems to "listen" and respond to data such as weather conditions, public service announcements, and much more. Accessing data in this manner allows municipalities, schools, and businesses to address and respond to changing conditions.

### Brivo Makes It Possible.

Brivo's Service Oriented Security Infrastructure™ (SOSI) enables the transfer of information between systems. SOSI uses Brivo's open XML Application Programming Interface (API) to exchange data in the XML standard so that diverse systems can "understand" one another.

## Service Oriented Security Infrastructure™ (SOSI)

Connect a Human Resources system to the access control system; new employees are automatically assigned proper credentials, and terminated employees have theirs automatically revoked.

Integrate a Website with access control to create new services; an online hotel reservation system accommodates guests arriving after hours by assigning a PIN code to enter after the front desk is closed for the night.

Integrate Services such as ID management so that customers extend the capabilities of their current system and manage badging data. The cost savings are great, and the capabilities are limitless.

## Brivo®'s XML API

The Brivo XML API is available to authorized Brivo dealers, end-users, and partners at no cost, and is available for ACS WebService™, ACS OnSite™, and OnSite appliance-based systems. To facilitate development and quality assurance, customers may choose to purchase an ACS OnSite control panel for more ambitious integration projects.

**To get started with Brivo's XML API, contact your Brivo Sales Representative, call us toll-free at 1-866-692-7486, option 1, or email us at [sales@brivo.com](mailto:sales@brivo.com).**

**Online Access Control... anywhere, anytime!**

**We give you options. You make the choice.**
