

BRIVO ACCESS

Control access and improve visibility across your facility, modernize operations and make data-driven decisions

Brivo Access is a breakthrough building security access control solution to deliver a safer, smarter, simply better future. With robust data analytics, streamlined workflows, identity management integrations, and powerful security features, you can protect your people, property and reputation.

APPLICATIONS & FEATURES

Access Control Visibility

- Event tracking for door activity and event classification to organize that activity by critical action needed, warning alert, or information for reporting
- Device status showing a focused display of all devices in your platform
- Site and door management to set up your access perimeter and interior doors
- Schedule creation to automate dates and times that anyone can gain access
- Admin management to support customized role-based permissions
- User management, credential management and group access permissions
- Lockdown to secure the facility in an emergency
- Live and recorded video indexed to system events for maximized security

Mobile Solutions and Remote Control

- Control access to your facilities from any device, anywhere
- Ease of use to manage facilities across the globe
- Infinite scalability as you grow your business/company
- Mobile credentials to modernize your facility

Data Analytics and Flexibility

- Analytics to zoom into access events and patterns to discover more about your facility
- Integrate with hundreds of other applications via our API
- Right-sized with features for any customer size, security need and data requirement
