

INTEGRATE BRIVO WITH YOUR IDENTITY MANAGEMENT SOLUTION

Ensure users' physical security access rights are always up to date with the **Brivo Identity Connector** provisioning integration.

Increased productivity.

Manage users from your identity management solution and eliminate manual, redundant work.

Automatic updates.

Changes made in Okta, Azure Active Directory or G Suite are automatically reflected in Brivo Onair for accurate access control.

Simplified security.

Quickly identify authorized users and reliably de-provision users to remove facility access.

Powered by Brivo Identity Connector

Add, modify or deactivate Brivo users in Okta, Azure Active Directory or G Suite so the right people always have the correct access to your facilities.

BRIVO ONAIR BECOMES A SEAMLESS PART OF YOUR IDENTITY MANAGEMENT NETWORK
