

Discontinued Cameras

This list contains a number of cameras that have been discontinued by Axis but may still be connected to the Brivo Onair Video service. Older camera models may become unsupported after a period of time.

Unlisted Cameras

Unlisted Cameras: Axis routinely updates and adds new cameras to its product line. If the camera you would like to use is not on this list, please contact sales@brivo.com for further information. Please note that Brivo Onair Video service does not support PTZ controls, panoramic cameras, multi-sensor cameras or cameras which require de-warping.

Firmware

Brivo recommends that all cameras be updated regularly to the current supported firmware version.
