BENEFITS OF INTEGRATING BRIVO ONAIR AND STRATIS

Give your residents a modern physical security experience where one app takes them from 'gate to unit.'

BENEFITS

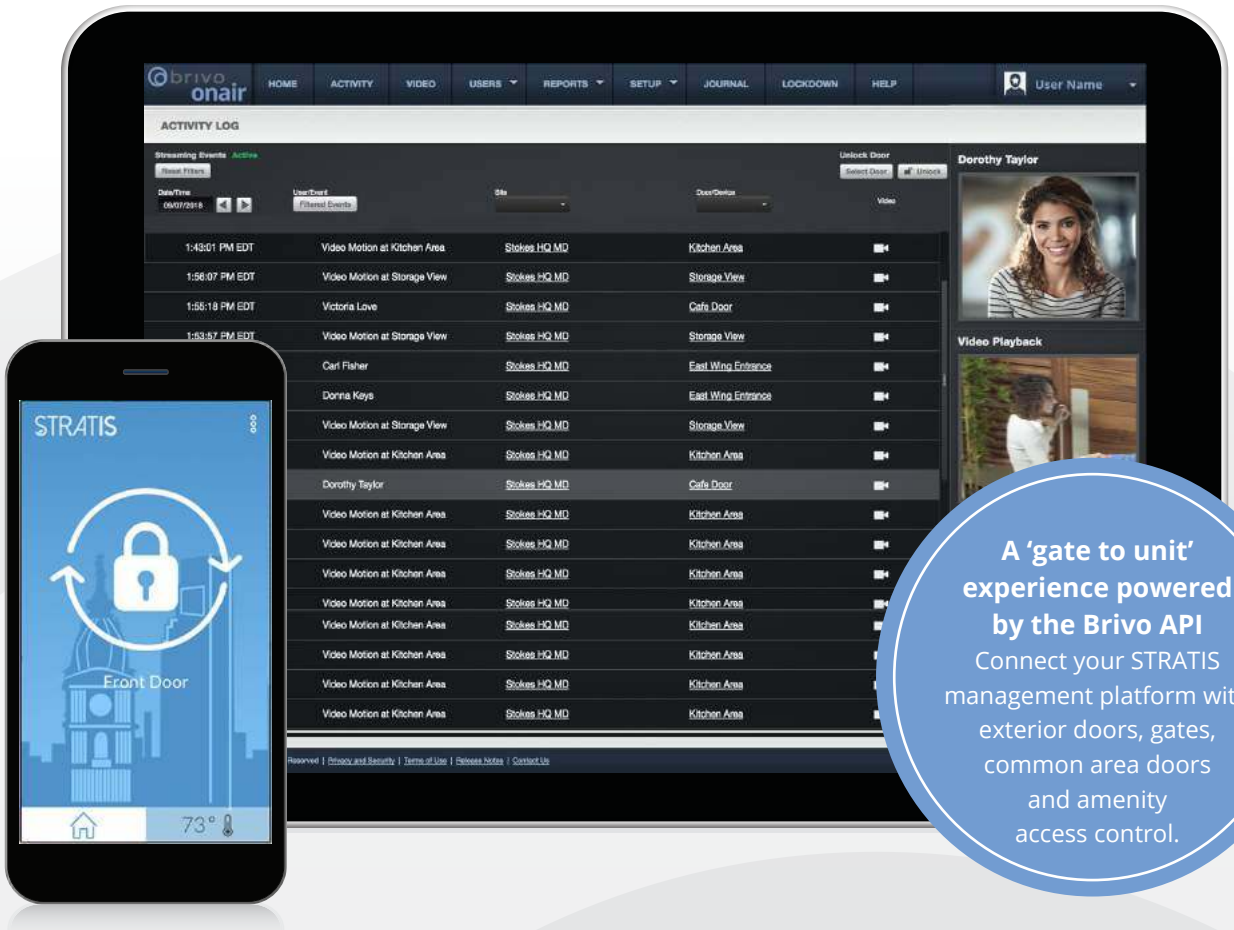
Control access to doors from one system.
Manage access to units, common areas, vehicle entry and parcel storage from one system instead of coordinating between disparate systems.

Take your credentials mobile.
Use secure mobile or physical credentials to control who enters exterior doors.

Deliver more value with modern security.
Attract residents who appreciate current technology like mobile credentials and the peace of mind of electronic security.

Manage Building Entry Points and Deliver Better Physical Security

- Ensure residents have appropriate common area door access with automatic user updates sent from STRATIS to Brivo Onair
- View video of common area door events in Brivo Onair
- Allow residents to access all doors with one mobile app on their smartphone and enjoy full smart-home automation inside their apartment with the STRATIS app



A 'gate to unit' experience powered by the Brivo API
Connect your STRATIS management platform with exterior doors, gates, common area doors and amenity access control.
