

## DOCUSIGN INTEGRATES ACCESS CONTROL AND VIDEO

while securing multiple facilities in  
expansion project

### THE CHALLENGE

DocuSign needed a flexible solution that was scalable, easy to manage and quick to deploy as they were quickly expanding their presence both domestically and internationally.

### THE CHOICE

**“We can easily add new facilities and doors as we develop our presence around the world.”**

-Chad Bosques, Director of Global Physical Safety and Security Operations at DocuSign

### WHY BRIVO

- Reduce operational inefficiencies and quickly deploy cloud access control to any facility
- Administer, monitor and report event activity from all locations in a single platform
- Add new doors and locations any time without the need to wire doors

### THE CHANGE

DocuSign can link access control events to video recordings in one unified interface to better understand what is happening at multiple locations around the globe.

Brivo access control helps DocuSign security staff monitor employees' behaviors to prevent asset or data theft. They can determine if a facility is vulnerable by receiving alerts for events, such as when a door is being forced or held open.

Brivo video surveillance integration combines video and access control management, allowing authorized security staff to download video clips and control doors from a single platform.

**“We’ve monitored a suspicious individual in the lobby of one of our buildings and viewed another in the act of theft after installing Brivo.”**  
- Chad Bosques

## IMPROVED DATA TRACKING AND TECHNICAL SUPPORT

**Audit trail with historical data tracking—** DocuSign security staff save time by viewing live and recorded video from each location in one platform and linking access control events to video to easily search for specific incidents.

**IT support and maintenance—** DocuSign appreciates the convenience and speed of the Brivo customer care team and their ability to quickly solve problems over the phone.

**“We no longer have to wait for a technician to come in, investigate and fix the issue. That’s the beauty of having a cloud-based access control system.”**

—Chad Bosques

## ABOUT DOCUSIGN

DocuSign, headquartered in San Francisco, provides electronic signature and digital transaction management services. It has four locations in the United States and locations in Brazil, Ireland, the United Kingdom, France, and Australia. DocuSign has more than 200 doors that need to be secured, monitored and managed at all times.

## ABOUT BRIVO

Brivo is the original innovator of cloud-based physical security solutions for commercial buildings. Currently serving over 15 million users, Brivo offers a unified security platform including access control, mobile credentials, mobile administration, video surveillance, identity and visitor management, and elevator control. As a SaaS company, Brivo also offers a complete API platform service that empowers partners to build custom integrations and vertical market offerings.

Our mission is to make the world a safer place by providing a subscription-based service for securing buildings using reliable, convenient, scalable, cyber-hardened technology.
