

A SMARTER WAY TO OPEN DOORS

The Brivo Onair Pass application lets you open doors and other entryways with a smartphone— even in WiFi and cellular dead zones.

We believe that access control should be as easy as making a call. Opening doors with cards or key fobs is a thing of the past. Upgrade your access experience and unlock doors with your mobile device.

Brivo Onair Pass was designed to take ordinary daily tasks off your list so you can conveniently keep your facility secure. No more:

Issuing, reissuing or ordering new cards and key fobs when someone loses them

Needing to be on-site to issue and distribute credentials

Retrieving credentials from contractors at project completion

Time wasted issuing employee day passes

“Our residents appreciate the mobile solution, and our employees can now focus on delivering a great resident experience.”

Community IT Manager,
Lifestyle Communities

Transition from your current credentials to mobile at your own pace.

SUPPORTS YOUR ROADMAP

CONVENIENT TO USE

Use on all your iOS or Android devices with mobile access for work, garage, gym or home.

Limit access to authorized users and visitors, while eliminating unwanted card or key copies.

SECURE

Say goodbye
to "Sorry, I
left my badge
at home."

Provide users
with mobile
credentials for
entering buildings
with just a click.

TYPICAL WAYS TO USE BRIVO ONAIR PASS

Enable users to
easily open on-
site gates and
garages from
their vehicle.

Provide easy to
revoke short-
term mobile
credentials.
